Full-Stack Developer experienced in building scalable web and mobile applications using ReactJS, React Native, Node.js, Express.js, and MySQL, with a focus on performance, usability, and clean architecture.

WORK EXPERIENCE

Software Developer

April 2025 – June 2026

Dynamic Global Soft Inc.

- Renovated and maintained frontend web and mobile applications for an event management platform with multi-role portals, registration, and ticketing features.
- Developed backend features for an offline-first e-learning system supporting low or no internet connectivity.
- Used technologies including **ReactJS, React Native, TypeScript, Node.js, Express.js, MySQL, Ant Design, TanStack Query, Zustand.**

Front-End Developer Intern

January 2025 – April 2025

Dynamic Global Soft Inc.

- Renovated the visitor portal of a web-based event management system to improve usability and performance.
- Integrated REST APIs and optimized UI/UX, including layouts, navigation flow, and overall application performance.
- Fixed UI bugs and improved system stability using **ReactJS, Axios, Ant Design, TanStack Query, and Zustand.**

PROJECTS

Event Management System | Front-End Web Developer *(Developed at Dynamic Global Soft Inc)*

Live Demo: <https://register.worldbexeevents.com>

- Led frontend development in renovating and enhancing an event management web application, improving usability and system performance.
- Built multi-role portals (visitor, exhibitor, admin) with features including registration, ticketing, profile management, and dashboards.
- Integrated secure payment gateways and optimized performance across web and mobile devices for a faster and more reliable user experience.

Worldbex Services International Community App | Mobile Developer *(Developed at Dynamic Global Soft Inc)*

[Play Store](#) | [App Store](#) | [App Gallery](#)

- Led the renovation of the mobile frontend for an event management application, improving usability, performance, and overall user experience through UI/UX enhancements.
- Developed and enhanced core features including event registration, event discovery, exhibitor details, and raffle participation, improving user engagement and app functionality.
- Integrated secure payment gateways to support in-app transactions and ticket purchases, ensuring reliable and safe payment processing.

Offline-first E-Learning Management | Back-End Developer *(Developed at Dynamic Global Soft Inc)*

Live Demo: Confidential

- Designed and developed scalable backend systems by creating optimized database schemas and building RESTful APIs, improving system performance and supporting core application functionality.
- Implemented a cloud-to-local data synchronization system to ensure consistent and reliable syncing of lessons, activities, and school data across environments, enabling seamless offline and online access.

SKILLS

Languages and Tools: HTML, CSS, JavaScript, TypeScript, C#, PHP, Axios, Tailwind CSS, ReactJS, Ant Design, React Native, Tanstack Query, Zustand, Node.js, Express.js, MySQL, REST API, CI/CD, AWS, Laravel, ASP.NET, Git, GitHub.

EDUCATION

UNIVERSITY OF RIZAL SYSTEM – BINANGONAN CAMPUS

August 2021 – June 2025

Bachelor of Science in Information Technology

- Led capstone/thesis software development using **Laravel, Livewire, Tailwind CSS, Alpine.js, and MySQL.**
