Software Developer with experience building web and mobile applications, delivering scalable backend systems and responsive user interfaces using modern JavaScript technologies.

WORK EXPERIENCE

Software Developer

April 2025 – Present

Dynamic Global Soft Inc.

- Developed and maintained frontend web and mobile applications using modern JavaScript frameworks, delivering responsive and user-friendly interfaces.
- Built a Web-Based Event Management System with visitor, exhibitor, and admin portals, enabling event creation, registration, and exhibitor management.
- Developed a mobile application for event visitors, enabling seamless event registration, ticketing, and user engagement.
- Developed IoT web application for real-time device monitoring and interactive system control
- Implemented backend features for an offline-first e-learning system, ensuring functionality in low or no internet connectivity environments.
- Utilized technologies including **ReactJs, React Native, React Native Paper, Expo, TypeScript, NodeJs, ExpressJs, MySQL, Axios, Ant Design, Tanstack Query, Zustand, PM2, PuTTY, and WinSCP.**

Front-End Developer Intern

January 2025 – April 2025

Dynamic Global Soft Inc.

- Developed and maintained web portals for managing visitors and exhibitors in an event management system.
- Integrated **REST APIs** to enable seamless data communication between frontend and backend systems.
- Improved user experience (UX) by optimizing page layouts, navigation flow, and application performance.
- Identified and fixed UI bugs, enhancing functionality and overall system stability.
- Utilized technologies including **ReactJs, Axios, Ant Design, Tanstack Query, and Zustand.**

PROJECTS

Event Management System | Front-End Web Developer *(Developed at Dynamic Global Soft Inc)*

Live Demo: <https://register.worldbxevents.com>

- Worked as main frontend web developer delivering scalable and user-centric interfaces.
- Developed visitor portal enabling seamless event registration and ticketing.
- Built exhibitor portal for profile setup, and engagement with event attendees.
- Created admin portal to manage events, registrations, and dashboard.
- Integrated payment gateways into the platform to enable secure and seamless online transactions for event registration.
- Ensured cross-platform compatibility and optimized performance for web and mobile users.
- Collaborated with backend developers and stakeholders to align features with business requirements.

Worldbex Services International Community App | Mobile Developer *(Developed at Dynamic Global Soft Inc)*

Play Store: <https://play.google.com/store/apps/details?id=com.dgsiworldbex.visitors&pli=1>

App Store: <https://apps.apple.com/ph/app/wsi-community/id6446133238>

App Gallery: <https://appgallery.huawei.com/app/C108239477>

- Worked as main frontend mobile developer delivering scalable and user-centric interfaces.
- Implemented event registration functionality for easy and efficient user onboarding.
- Developed explore events feature to browse and discover upcoming events dynamically.
- Integrated payment gateways for secure in-app transactions and ticket purchases.
- Developed exhibitor details module to display profiles, services, and booth numbers.
- Implemented event raffle feature allowing visitors to join and participate in event-based giveaways and draws.
- Collaborated with backend developers and stakeholders to align features with business requirements.

IOT Web Application | Front-End Web Developer *(Developed at Dynamic Global Soft Inc)*

Live Demo: Confidential

- Worked as frontend web developer delivering scalable and user-centric interfaces.
- Developed admin portal for monitoring overall system operations, user management, and analytics.
- Built vendor portal for managing vending machine operations, transactions, and sales tracking.
- Implemented procurement management feature in the vendor portal to handle ordering and managing supply of products.
- Created supplier portal to manage product supply, deliveries, and order fulfillment.

Offline-first E-Learning Management | Back-End Developer *(Developed at Dynamic Global Soft Inc)*

Live Demo: Confidential

- Worked as main backend developer, designing database schemas and developing RESTful APIs to support scalable and efficient system functionality.
- Developed a data synchronization mechanism to sync lessons, activities, and user data between cloud and local machines.
- Ensured reliable offline functionality, allowing users to access learning materials without internet connectivity.

TECHNICAL AND SOFT SKILLS OVERVIEW

Front-End Development

HTML, CSS, JavaScript, TypeScript, Axios, Tailwind CSS, ReactJS, Ant Design, React Native, Expo, API Integration, Tanstack Query, Zustand state management.

Back-End Development

NodeJs, ExpressJs, PHP, Laravel, C#, REST API, .NET, ASP.NET

Hosting/Publishing sites, repository and others

Visual Studio Code, Github, Postman, PM2, WinScp, Putty, CI/CD, Github Actions, AWS.

Database

MySQL

Web Design

Figma

Soft Skills

- Adaptability and continuous learning
- Time management and multitasking
- Problem-solving and analytical thinking

EDUCATION

UNIVERSITY OF RIZAL SYSTEM – BINANGONAN CAMPUS

August 2021 – June 2025

Bachelor of Science in Information Technology

Capstone Project: Web-Based Management Information System for JC’s Skin Works Dermatology Clinic

Tech Stack: TailwindCSS, AlpineJs, Laravel, Livewire

Role: Lead Developer
